

WALA EDDINE GHAZOUANI

AI / Machine Learning Engineer | Final-Year Engineering Student

Ariana, Tunisia | +216 28 524 395 | walaghazouani.work@gmail.com

linkedin.com/in/ghazouani-wala-eddine | github.com/Ghazouaniwala | huggingface.co/Ghazouaniwala

Available January–June 2027 for a 6-month final-year engineering internship | Open to relocation — Europe | Canada

Professional Summary

Final-year Data Science engineering student at ESPRIT who takes AI systems from fine-tuning through to a deployed, monitored application. Two AI internships at Wevoo, two speech models published on Hugging Face, and project lead of a six-person multi-agent platform delivered with an industry partner. Focused on Large Language Model (LLM), multimodal and agentic systems, plus the MLOps that keeps them running.

Experience

AI Engineering Intern — Wevoo, Ariana, Tunisia

Jun 2026 – Aug 2026

- Designed and shipped **Solace**, a real-time multimodal AI coaching system: full-duplex voice over WebSocket, concurrent facial (EfficientNet-B0, ONNX) and vocal (wav2vec2-XLSR-53) emotion classifiers, and a Retrieval-Augmented Generation (RAG) layer over 603 clinical documents.
- Fine-tuned and published two models to Hugging Face (speech-emotion classifier, 7 classes; F5-TTS Tunisian Derja synthesis) and cut end-to-end latency **4.1x** by restructuring the inference pipeline for streaming and parallel execution.

AI Engineer (Freelance) — Upwork, Remote

2025 – Present

- Develop AI systems for international clients: Retrieval-Augmented Generation (RAG) chatbots over client knowledge bases, Python AI agents and workflow automation, and web-scraping pipelines that turn scattered sources into structured data — scoping to deployment, integration and handover.

Software Engineering Intern — Wevoo, Ariana, Tunisia

Jul 2025 – Aug 2025

- Built **MeetSummary**, a self-hosted Microsoft Teams meeting summariser: Graph OAuth 2.0, automated OneDrive recording discovery, Whisper transcription, LLM summarisation and PDF export.
- Delivered solo over three Scrum sprints (18 user stories, UML) on a hybrid JavaFX + Flask architecture with a REST bridge and MySQL data model.

Projects

FX AlphaLab — Multi-Agent Financial Intelligence Platform

Feb 2026 – Jun 2026

Python, PyTorch, XGBoost, scikit-learn, ChromaDB, FastAPI, MLflow, Prometheus, Docker | /fx-alphalabs

- Project Lead** of a six-person team over five months — an ESPRIT integrated engineering project delivered with **VALUE**; owned the macroeconomic agent in full (ingestion, feature engineering, market-regime detection, training, orchestration).
- Set up the MLOps layer: separate Docker images for training and serving, MLflow tracking, Prometheus monitoring, and backtesting on win rate, profit factor, drawdown and Sharpe ratio.

Wathiqā — Arabic Handwritten Document Intelligence

Mar 2026 – May 2026

Python, TrOCR, PyTorch, OpenCV, EasyOCR, FastAPI, SQLAlchemy, pytest | /Wathiqā

- Adapted a TrOCR vision-encoder/decoder to handwritten Tunisian Arabic (30k-token Arabic vocabulary), routing each field type to a purpose-built engine and registering pages with SIFT keypoints and RANSAC homography.
- Enforced multi-tenant data isolation structurally at the session layer, with an append-only audit log and 123 tests including cross-tenant checks.

Critiq — Multi-Agent Brand & UX Analyzer

Apr 2026 – Jun 2026

Python, LangGraph, vLLM (Llama 3.1 70B), ChromaDB, FastAPI, Playwright, React | /Critiq

- Orchestrated six parallel agents with a LangGraph `StateGraph`, scoring 14 weighted UX dimensions grounded in a ChromaDB corpus of published UX research (NN/g, Baymard, WCAG 2.1).
- Served self-hosted Llama 3.1 70B on vLLM behind retries, a circuit breaker and a deterministic heuristic fallback per dimension, delivering a full audit in under 3 minutes.

Technical Skills

Languages	Python, SQL, Java, C, TypeScript/JavaScript
AI & ML	Machine Learning, Deep Learning, Computer Vision, Natural Language Processing (NLP), Large Language Models (LLM), Retrieval-Augmented Generation (RAG), fine-tuning (LoRA/PEFT), multimodal fusion; PyTorch, Hugging Face Transformers, TensorFlow/Keras, scikit-learn, XGBoost, ONNX, OpenCV, spaCy, LangGraph, ChromaDB, vLLM, wav2vec2, Whisper, TrOCR
MLOps & Backend	Docker, MLflow, Prometheus, CI/CD, Git, pytest; FastAPI, Flask, REST, WebSocket, Pydantic, SQLAlchemy, Spring Boot, MySQL, Pandas, NumPy; React, Vite, Tailwind CSS, JavaFX; Agile/Scrum, UML

Education

Engineering Degree in Computer Science — Data Science — ESPRIT, Ariana, Tunisia

Sep 2024 – Jun 2027

Preparatory Cycle for Engineering Studies — Maths & Physics — IPEI Bizerte, Tunisia

Sep 2022 – Jun 2024

Certifications & Languages

NVIDIA Deep Learning Institute — Fundamentals of Deep Learning (2026), Building AI Agents with Multimodal Models (2025), Generative AI with Diffusion Models (2025) | **365 Data Science** — LLM Engineering with Streamlit and OpenAI (2026)

Languages: Arabic (native) | French (fluent, C1) | English (professional, C1)
